Projects

Quoi | Capstone Project | iOS/Swift/JS/Express/PSQL | (github: [quoi-ios](#) | [quoi-server](#))

A quiz app with a twist! Quoi challenges you to answer a daily question in 60 seconds or less, and then helps you track your progress, review prior questions, and brush up on related topics.

DashDash | JS/React/Express/PSQL | (github: [dashdash-frontend](#) | [dashdash-server](#))

Group project: Create a nested set of timers to stay on track during a larger task.

Moodshrooms | JS/Bootstrap/Express/PSQL | (github: [q2project-moodshrooms-client](#) | [q2project-moodshrooms-server](#))

A fun website where you can create cartoon mushroom characters called 'Moodshrooms'.

Form Guard | HTML/CSS/JS | (github: [q1project-form-guard](#))

Chrome extension that protects form data against loss in the event of reload, closure, or crash.
